UITSLAG Geslaagd

Rotterdam, 25 januari 2018

De voorzitter van de examencommissie

mr. E.E. van Herwijnen

Main fields of study:

- Entrepreneurship
- Financial Management
- Organization & Law
- Marketing
- Sales
- Communication

Competencies / Learning outcomes

- 1. During this study, theory and practical classes are given to teach students to behave and act as efficiently as possible and to achieve the defined competencies. The competencies are based on level 1 and 2 of the bachelor competencies of Commerce:
 2. Initiating and creating products and services, independent and entrepreneurial.
 3. Performing, interpreting, testing and evaluating market research.
 4. Establishing the strengths and weaknesses of a company based on an analysis of the internal business processes and corporate culture, as part of the value chain, and Secondly establishing the opportunities and threats to the local, national and/or international market based on relevant national (and international) trends.
 5. Developing a marketing strategy for a national or international company and underpinning and substantiating the choices made. Drafting, implementing and revising plans on the basis of the marketing strategy.
 6. Developing and maintaining business relationships for purchase, sales and services.
 7. Communicating in several languages, with due regard for cultural differences, internally and externally, nationally and internationally.
 8. Leading a company, business, or business project.

4.4 Information on the Dutch grading system

The grading system has remained unchanged for several decades: the scale ranges from 10.0 (pass with distinction) to 1.0 (very poor). The lowest passing grade is 5.5; 9s are seldom given and 10s are extremely rare; grades 1, 2 and 3 are hardly ever used.

Explanation of the Dutch grades

- 10 pass with distinction
- 9 pass with merit
- 8 very good pass
- 7 good pass
- 6 pass
- 5 near pass
- 4 fail
- 3 bad fail
- 2 poor
- 1 very poor

Hoger Beroepsonderwijs

Op grond van artikel 7.10a lid 2 van de Wet op het hoger onderwijs en wetenschappelijk onderzoek (Stb. 1992, 593) verklaart de examencommissie van de bachelor opleiding Leraar van de eerste graad in Lichamelijke Opvoeding van de Christelijke Hogeschool Windesheim dat

geboren
het afsluitend examen van de bachelor opleiding
successfully completed the final examination of the Bachelor's Degree Programme in

Leraar van de eerste graad in Lichamelijke Opvoeding

Teacher Education in Physical Education

met goed gevolg heeft afgelegd op 28 juni 2018 / on 28 June 2018

Op grond daarvan heeft het College van Bestuur de graad Bachelor of Education verleend en bestaat tevens het recht tot het voeren van de titel baccalaureus (bc.). Met het examen is voldaan aan de wettelijke vakbekwaamheidseisen om werkzaam te kunnen zijn in het onderwijs in lichamelijke opvoeding in het primair, voortgezet en voorbereidend hoger onderwijs alsmede in het beroepsonderwijs en de volwasseneneducatie.

4.4 Grading scheme and, if available, grade distribution guidance

The Dutch grading system, used from primary through to university education, is the 1 to 10 scale given in the following table, in which 10 is the highest grade, 6 the minimum pass, and 1 the lowest grade.

Official Dutch grading scheme	Additional Windesheim grading scheme	Additional Windesheim grading scheme
10 (Excellent)	Uitmuntend (Excellent)	Voldean (Pass)
9 (Very good)	Zeer goed (Very good)	Vrijstelling (Exemption)
8 (Good)	Goed (Good)	
7 (Satisfactory)	Ruim voldoende (Satisfactory)	
6 (Sufficient)	Voldoende (Sufficient)	
5-1 (Fail)		

4.5 Overall classification of the qualification

Pass

An Associate, Bachelor or Master Degree is awarded a 'pass' either when the grade point average is between 6 and 10 or sufficient or pass; based upon the official Dutch grading scheme.

Cum laude

An Associate, Bachelor or Master Degree is awarded a 'cum laude' when the overall final grade point average is at least 8 (not rounded up) and whereby a minimum grade point average of 6 (sufficient) or higher has been obtained for each examination; all based upon the official Dutch grading scheme and all attained at first attempt.

8. Information on the national higher education system

Introduction

The higher education system in the Netherlands is based on a three-cycle degree system consisting of Bachelor's, Master's and PhD degrees. The three-cycle system was officially introduced in the Netherlands at the beginning of the academic year 2002-2003. The Netherlands has a binary system of higher education, which means there are two types of programmes: research-oriented education (wetenschappelijk onderwijs, WO), traditionally offered by research universities, and higher professional education (hoger beroepsonderwijs, HBO), traditionally offered by hogescholen or universities of professional education. For a schematic overview of the education system please refer to the diagram at the end.

Secondary education

Secondary education, which begins at the age of 12 and is compulsory until the age of 16, is offered at several levels. The two programmes of general education that grant admission to higher education are HAVO (five years) and VWO (six years). Pupils are enrolled according to their ability and although VWO is more rigorous, both HAVO and VWO can be characterized as selective types of secondary education. The VWO curriculum prepares pupils for university and only the VWO diploma grants admission to WO. The HAVO diploma is the minimum requirement for admission to HBO. The last two years of HAVO and the last three years of VWO are referred to as the tweede fase or upper secondary education. During these years pupils focus on one of four subject clusters (profielen), each of which emphasizes a certain field of study in addition to satisfying general education requirements. Each cluster is designed to prepare pupils for programmes of study at the tertiary level. A pupil enrolled in VWO or HAVO can choose from the following subject clusters:

- Science and Technology (Natuur en Techniek)
- Science and Health (Natuur en Gezondheid)
- Economics and Society (Economie en Maatschappij)
- Culture and Society (Cultuur en Maatschappij).

Senior secondary vocational education and training

Senior secondary vocational education and training (middelbaar beroepsonderwijs, MBO) is offered in the areas of economics, technology, health, personal care, social welfare and agriculture. MBO programmes vary in length from one to four years as well as in level (1 to 4). Completion of MBO programmes at level 4 qualifies pupils for admission to HBO.

Higher education

Higher education in the Netherlands is offered at two types of institutions: research universities (universiteiten) and universities of professional education (hogescholen). The former include general universities, universities specializing in engineering and agriculture and the Open University. The latter include general institutions and institutions specializing in a specific field such as agriculture, fine and performing arts or teacher training. Universities of professional education are primarily responsible for offering programmes of higher professional education (hoger beroepsonderwijs, HBO), which prepare students for specific professions. These tend to be more practically oriented than programmes offered by research universities. In addition to lectures, seminars, projects and independent study students are required to complete an internship or work placement (stage) which normally takes up part of the third year of study, as well as a final project or a major paper in the fourth year. Since September 2002 the higher education system in the Netherlands has been organized around a three-cycle degree system consisting of Bachelor's, Master's and PhD degrees. At the same time the ECTS credit system was adopted as a way of quantifying periods of study. The higher education system continues to be a binary system however, with a distinction between research-oriented education and professional higher education. The focus of a degree programme determines both the number of credits required to complete the programme and the degree which is awarded. A WO Bachelor's programme requires the completion of 180 credits (3 years) and graduates obtain the degree Bachelor of Arts or Bachelor of Science (BA/BSc), depending on the discipline. An HBO Bachelor's programme requires the completion of 240 credits (4 years) and graduates obtain a degree indicating the field of study, for example Bachelor of Engineering (BEng) or Bachelor of Nursing (BNursing). The old title (pre-2002) appropriate to the discipline in question (bc., ing.) may still be used. WO Master's programmes mostly require the completion of 60 or 120 credits (1 or 2 years). Some programmes require 90 (1.5 years) or more than 120 credits. In engineering, agriculture and math and the natural sciences 120 credits are always required. Graduates obtain the degree of Master of Arts or Master of Science (MA/MSc). The old title (pre-2002) appropriate to the discipline in question (drs., mr., ir.) may still be used. HBO Master's programmes require the completion of 60 to 120 credits and graduates obtain a degree indicating the field of study, for example Master of Social Work (MSW). The third cycle of higher education, leading to a doctor's degree, is offered only by research universities. All research universities in the Netherlands are entitled to award the country's highest academic degree, the doctoraat, which entitles a person to use the title doctor (dr.). The process by which a doctorate is obtained is referred to as the promotie. The doctorate is primarily a research degree, for which a dissertation based on original research must be written and publicly defended. The minimum amount of time required to complete a doctorate is four years.

Requirements for admission to higher education

To enrol in a WO Bachelor's programme a student is required to have a VWO diploma or to have completed the first year (60 credits) of an HBO programme. The minimum admission requirement for HBO is either a HAVO diploma or a level-4 MBO diploma. The VWO diploma also grants admission to HBO. For admission to both types of higher education pupils are required to have completed at least one of the subject clusters that fulfils the requirements for the higher education programme in question. A quota (*numerus fixus*) applies to admission to certain programmes, primarily in the health sector, and places are allocated using a weighted lottery. Potential students older than 21 years of age who do not possess one of the qualifications mentioned above can qualify for admission to higher education on the basis of an entrance examination and assessment. The only admission requirement for the Open University is that applicants be at least 18 years of age. For admission to all Master's programmes, a Bachelor's degree in one or more specified disciplines is required, in some cases in combination with other requirements. Graduates with an HBO Bachelor's degree may have to complete additional requirements for admission to a WO Master's programme.

Credit system and grading

A student's workload (both contact hours and hours spent studying and preparing assignments) is measured in ECTS credits (*studiepunten*). According to Dutch law one credit represents 28 hours of work and 60 credits represents one year of full-time study. The grading system has remained the same for several decades: the scale is from 1 (very poor) to 10 (outstanding). The lowest passing grade is 6; 9s are seldom given and 10s are extremely rare. Sometimes decimal points are used (e.g. 7.8).

Accreditation and quality assurance

A guaranteed standard of higher education is maintained through a national system of legal regulation and quality assurance. The Ministry of Education, Culture and Science is responsible for legislation pertaining to education. As of 2002 responsibility for accreditation lies with the Netherlands-Flemish Accreditation Organization (NVAO). According to the section of the Dutch Higher Education Act that deals with the accreditation of higher education, degree programmes offered by research universities and universities of professional education will be evaluated according to established criteria and programmes that meet those criteria will be accredited, i.e. recognized for a period of six years. Only accredited programmes are eligible for government funding, students receive financial aid only when enrolled in an accredited programme and students will graduate with a recognized degree only after having completed an accredited degree programme. Accredited programmes are listed in the Central Register of Higher Education Study Programmes (CROHO) and the information is available to the public. Institutions are autonomous in their decision to offer non-accredited programmes, subject to internal quality assessment. These programmes do not receive government funding.

Explanation of RSM MBA Grading Scale

Grades are determined using the guidelines of the European Credit Transfer System (ECTS). The ECTS grading scale is a grading system defined in the ECTS framework by the European Commission <http://ec.europa.eu>

RSM GRADE (GPA EQUIVALENT)	ECTS GUIDELINES (RSM CLASS RANK)	ECTS LETTER GRADE
4.00 (Excellent)	Best 10%	A
3.50 (Very Good)	Next 25%	B
3.00 (Good)	Following 30%	C
2.50 (Satisfactory)	Following 25%	D
2.00 (Low Pass)	Final 10%	E
Fail	Fail	F

The final grade incorporates a number of components. The weighted summation of these components produces a final percentage for a course or project. These will then be translated into the ECTS grading scale. This scale is based on the class percentile looking at how a student performed relative to the rest of the cohort.

Additional Notations

- P Pass
- LP Low Pass
- I Incomplete
- GP Grade Pending
- RP Repeat Pass
